Field Closing Checklist

H5A, H5B, H5C, H5D

- Take-up the bases and replace base plugs. Put bases in dugout closets or Storage boxes.
- 5C and 5D: Store both pitching machines in the dugout closets (with the legs still attached).
    - On 5C: the On Field machine goes in the 3rd base dugout, Cage machine in the 1st base dugout.
    - On 5D: the On Field machine goes in the 1st base dugout, Cage machine in the 3rd base dugout.
- Tarp Home plate and place pipe weights on top. The Tarps should cover the batters boxes. **Do not Tarp the pitcher's circles**
- If you are the last team practicing or playing on any of the 5 complex fields (5A, 5B, 5C, or 5D) you must turn off all the breakers for the lights in the 1st base dugout of 5C.
- During the Spring Season or when the scoreboard is in use:
    - **Put the scoreboard controllers into the metal Boxes on 5C and 5D.**
    - Turn off the breakers for the 5B, 5C, and 5D scoreboards in the small breaker box in 5C dugout. **DO NOT TURN OFF ALL OF THE BACKSTOP, CAGE, or DUGOUT breakers**

Troubleshooting Power Problems:

1. Verify that the GFI reset switch found on the outlets in front of the scorer's table have not been tripped (*red light is on*). If they have, press the reset button.
2. Check that someone has not turned off the Breakers in the 5C 1st base dugout closet.
3. Check the Main Breaker switch on the Panel of switches behind the right field fence of 5C.
4. Check the Main Breaker switches on the Main Panel located in the bushes behind right-center field of 5D.
5. There should be a bag of field dry and chalk in each dugout for field prep and small areas to be dried after rain. If more than one or two bags of field dry are needed please contact the Field Maintenance coordinator.

OPT-IN for Field Status Alerts by texting OMYBS to 84483.
