Field Closing Checklist

H1, H4, H6

- Take-up the bases and replace base plugs. Put bases in dugout closets or Storage boxes.
- Tarp Home plate and place pipe weights on top. The Tarps should cover the batters boxes.
- Rake, Repair, tamp, and tarp the pitcher's mound
- If you are the last team practicing or playing you must turn off all the breakers for the lights on the main panel.
    - H1 – Panel behind bushes beyond the RF fence
    - H4 – Panel behind the Right Field Fence
    - H6 – Panel in the bushes behind Field 5D
- When the scoreboard is in use:
    - **Put the scoreboard controllers into the metal Boxes on H1 and H4, and in the 1st base dugout of H6.**
    - Turn off the scoreboard breakers labeled on the same panel with the lights except for H6. On H6 you must flip the breaker on the back of the scoreboard

Troubleshooting Power Problems:

1. Check the Main Breaker switches on the Panels listed above
2. There should be a bag of field dry and chalk in each dugout for field prep and small areas to be dried after rain. If more than one or two bags of field dry are needed please contact the Field Maintenance coordinator.

OPT-IN for Field Status Alerts by texting OMYBS to 84483.
