RE: COVID-19 Quarantine Protocols

Good afternoon Mudsock Youth families,

The Mudsock Youth Athletics board of directors met last night to discuss the recent quarantine requirement changes that were announced by HSE Schools last Friday. Since mid-2020, Mudsock Youth Athletics has required any participant or volunteer who was considered a close contact or potential COVID-19 exposure to quarantine for 14 days from the date of exposure.

After deliberation, the board voted to change the Mudsock Youth Athletics COVID-19 close contact quarantine guidelines, effective immediately, to the following:

- 10-day quarantine with return to athletic activities on day 11, or
- 7-day quarantine with a return to athletic activities on day 8, if a negative PCR test was obtained on day 5, 6 or 7 from date of exposure.

We ask that you continue to communicate with your coach when your participant is considered a close contact. If you are a coach, we ask that you notify your league president or commissioner and communicate with your team, when directed.

This change to the quarantine guidelines does not impact the requirements for an unvaccinated individual who tests positive for COVID-19. Mudsock Youth Athletics still requires 10-day self-isolation from the date of the positive COVID-19 test. Please continue to notify your coach or league official as soon as you or your participant tests positive to help mitigate the spread.

We will continue to work with the Fishers Health Department and HSE Schools to provide our participants as many opportunities to play on the fields and courts in our community. Please do your part in following these guidelines and keeping our participants and volunteers safe.

If you have any questions about this change and how it affects your currently quarantined participant, please e-mail info@myathletics.com.

Have a great weekend,
Mudsock Youth Athletics

REMINDER If a volunteer or participant is fully vaccinated and not symptomatic, a different set of protocols apply. Please reach out to info@myathletics.com for further clarification on these differences.
