

Burlingame AYSO

Air Quality Protocol

[Last updated Sept. 8, 2021]

The following sets forth air quality guidelines for Burlingame AYSO practices and games.

- No outdoor practices or games will be held if Air Quality Index (AQI) is greater than 125.
- Coaches' discretion whether to hold practice below AQI 125.
- All players/families should exercise their own discretion and determine whether or not it is appropriate for the player to participate in outdoor activity in light of the air quality.
- Reference Purple Air, Outdoor Sensors for 94010 for AQI.
- Stay connected to your team sites/emails for coach updates on whether practices will be held. AYSO will also update all families by email when practice or games will not be held due to air quality.

Please email safety@burlingameayso.org with any questions.
