

Protocol for Returning to Play

After a COVID 19 Positive Test or Exposure, AYSO Coaches, Volunteers, and Players must follow these protocols before returning to any practice session or AYSO event.

RETURNING TO PLAY AFTER A COVID-19 POSITIVE TEST

- AYSO Coaches, Volunteers, Parents/caregivers and players are required to follow and complete the isolation/quarantine instructions from their medical provider or the county health department before returning to AYSO activities. More information can be found at <https://www.smchealth.org/coronavirus> and [CDC.gov/coronavirus](https://www.cdc.gov/coronavirus).
- AYSO Coaches, Volunteers and Players must be approved by the Safety Director at safety@sanbrunoayso.org before returning to AYSO activities. If a youth player has a COVID-19 infection (even asymptomatic), they must obtain medical clearance from their doctor and provide that documentation to the Safety Director before returning to play.

RETURNING TO PLAY AFTER A COVID-19 POSITIVE EXPOSURE

- AYSO Coaches, Volunteers or Players who have been exposed to a COVID-19 positive individual, whether at a team session (coach/volunteer/player) or outside of AYSO, will not be allowed to attend practice sessions or any other AYSO event for at least 14 symptom-free days.

NOTE: This protocol may be revised at any time based upon recommended practices by the local or federal public health officials.
