## **8, 10, and 15 Run Rule, What Parents need to know**

Baseball and softball are unique when compared to most other youth sports. Neither has a set time limit and both require the defense to achieve a specific goal – three outs per inning – in order for the game to advance.

Understanding this distinction, while recognizing that the players are children of varied abilities, makes it easier for anyone to appreciate the importance of pace of play in Little League Baseball® and Little League Softball® games.

## **NEW Training for Board Members and Volunteers**

### **PLEASE TAKE IT!**

Developed in coordination with the Little League guide and focused on providing league administrators with everything needed to operate a successful Little League Program, this course provides an overview of administrative responsibilities and best practices based on the seasonality of the local league. While available for volunteers to complete starting with the 2023 season, this course will be strongly recommended for all local league and district volunteers to complete beginning in 2024 and beyond..

## **Regular Season to Tournament: Rule Differences**

During the Little League® International Tournament there are specific rules that are modified from those used during regular-season play. To be aware and understand how to apply and explain the tournament versions of these common rules, please review these comparisons the current *Little League* rules, and *Polices*.
