

Academic Study: “An Exploration of Parental Knowledge Acquisition in Sports: Implications for Facilitating Athlete Development”

Dear HYR Parents,

I am currently conducting a research study titled, “An Exploration of Parental Knowledge Acquisition in Sports: Implications for Facilitating Athlete Development” and I believe your experience and insight would be a valuable addition to this project.

The purpose of this study is to examine how youth sport parents acquire knowledge and the sources they utilize in their role as facilitators of athlete development.

Participation in the study will involve a one-time, 45–60 minute recorded Zoom interview/phone call.

We do not anticipate any risks with participating in the study, but do believe the project has the potential to be very beneficial to parents, athletes, coaches and sport administrators looking to understand how parents acquire knowledge to facilitate their children’s athlete development.

You do not have to be in this study, your decision to be in any study is totally voluntary.

If you feel you understand the study and would like to participate, please *respond to this email so we can coordinate a time for the interview.*

If you have questions prior to participating, please contact either the Primary Investigator or I:

- Peter Myre at pdmyre@unm.edu
- Edward Horne at ehorne1@unm.edu

Thank you for your time,

Peter Myre
