

January 5, 2022

We are excited to announce that our Athletic Trainer, Nathan Skelton from Children's Hospital, will be coming on in a full-time capacity going forward! See below for a little bit about Nathan and what this new transition will look like for us going forward.

Nathan Skelton is a Certified Athletic Trainer from Denver, Colorado and has been working at Children's Hospital since 2018. Prior to coming to Children's Hospital, Nathan worked as an Athletic Trainer for Valor Christian High School in Highlands Ranch, CO, providing primary coverage for all sports teams, games, practices, as well as clinical coverage. Nathan is a Colorado native and received his BA in Athletic Training from Point Loma Nazarene University, in San Diego, in 2015, and his MS in Sports Science and Rehabilitation from Logan University in St. Louis, Missouri in 2019, where he graduated as Valedictorian.

Nathan will be available Monday-Thursday at Stenger Soccer Complex or Long Lake (location varies depending on day of week) for practice coverages and working with our athletes on injury prevention, as well as covering home league games on Saturdays. In addition to his work during the season, Nathan will be available at our club events, tournaments, camps and off-season team practices. Please email him to set up any evaluations in order to reserve a time slot. He is also available by email for any questions or concerns you may have in relation to your child's athletic injuries. These evaluations will be done free of charge. He can also help with the referral process to Children's Hospital Colorado if you need to see an orthopedic physician or need physical therapy for any ongoing injuries. If you have any questions about the services he can provide please do not hesitate to reach out to him at Nathan.Skelton@childrenscolorado.org

In addition, feel free to download the Healthy Roster App below to keep track of your athlete's injury evaluation notes, physical therapy recommendations, practice status, as well as to communicate directly to Nathan with any questions.

This is your primary method for seeing any notes that Nathan has for your athlete's injuries, as well as to see any status changes to your athlete.
