

## AHFC HEALTH ASSESSMENT

### PLAYER & COACH HEALTH ASSESSMENT

- Does your player have a fever of 99.6°F or higher or has your player had a fever within the last 24 hours without aid of medicine?
- Does your player have a cough, sore throat, chills, fatigue or shortness of breath?
- Does your player have nausea, vomiting or diarrhea?
- Does your player have Dysgeusia (loss of sense of taste)?
- Has your player had Pneumonia and/or flu within the last 10 days?
- Has your player tested Covid positive?
- Has your player had Direct Exposure with anyone who has lab-confirmed COVID-19 within 10 days of symptom onset?
  - The CDC defines a Direct Exposure as anyone who has been within 6 feet of a person infected with the virus for a prolonged period of time (15 minutes or greater) or has had direct contact with the infected person's secretions (cough or sneezing). If any answer is Yes, please do not return to play until the necessary action is taken.

If any answer is Yes, please do not return until the necessary action is taken.

*The AHFC Health Assessment is subject to change based on CDC, National, State, Local, League guidelines and requirements.*
