

▶▶ LIGHTNING POLICY

To ensure the safety of all players, staff, and spectators, AHFC follows the guidelines below in the event of lightning:

Monitoring

- AHFC uses WeatherBug and the Lightning App to monitor lightning activity for facilities that do not have a Lightning Monitoring system.

Suspension of Play

- If lightning is detected within 10 miles, or if the Lightning Monitoring System is activated, all activities will be immediately suspended.
- All players, staff, and spectators must leave the field immediately and wait in their cars.

Delay & Cancellation

- A minimum 30-minute delay will be observed from the time of the last lightning strike within 10 miles, or from the activation of the Lightning Monitoring System.
- If a session is over halfway through the scheduled delay period, that session will be canceled.

Resumption of Play

- Play may only resume after 30 consecutive minutes have passed without any lightning detected within 10 miles or any activation of the Lightning Monitoring System.
