Keith Gunn, Savannah, United States of America

### Poor keeper position

In this image, the defending team has been caught very flat and because the goalkeeper has stayed near the goal the RED team has huge amounts of space to exploit behind the defensive line.

### Good keeper position

In this image, the defending team has been caught very flat, but because the goalkeeper is higher up the field, the RED team has less space to exploit behind the defensive line and are less likely to create a clear scoring chance.
