

Set up:

During Play:

Directions:

- Similar to "Around the World" players will shoot one at a time from any of the five shooting lines. They will begin with the closest shot.
 - If they make a shot they will continue to the next assigned spot
 - If they miss it they are given the choice to "Stay" or "Chance it." If they choose to "Stay" they will begin their next turn from that same spot. If they choose to "Chance" it, they will take another shot from the same spot. By making it they will continue on with their turn, but if the player misses this second shot they must return to the beginning spot on their next turn.
- Players try to be the first to make a shot at each of the assigned spots on the 5 shooting lines.
- Once a player has made all 3 shots at that line they have won that line and no other players can shoot from it.
- The first player to win 3 shooting lines is the winner
