## Highlights

### Age Group Changes for 2026-2027 Season

Starting with the 2026-2027 season there will be a shift in age groups. Instead of the current January 1st birthday cutoff system, we'll be transitioning to an August 1st - July 31st age grouping structure. This means players born between August 1st and July 31st will now compete together in the same age division. This change is being adopted nationwide by major youth soccer organizations to better align soccer teams with school year friendships and reduce disruptions to player development.

The reason for this shift centers on creating better experiences for young athletes. The current January cutoff creates challenges for players whose soccer age group doesn't match their school grade, particularly affecting 8th graders and high school seniors who may find themselves separated from school friends or facing limited playing opportunities. The August 1st system allows more players to compete alongside their classroom peers, which research shows helps with player retention and enjoyment of the sport.

What this means for your family: Review your child's birthdate to determine their new age group placement, as some players will move to different teams next season. While change can feel uncertain, this adjustment is designed to create more natural team compositions and better long-term soccer experiences.
