

Mill Creek Little League

In-Game/Practice Accident Procedure

If injury occurs:

1. Manager call for “time” if during a game and if not already granted.
2. Manager or assistant coach check on player (one adult must remain in dugout.)
3. Safety parent or coach assess injury and provide first aid as necessary. (Up to only 3 approved volunteers on field during game.)
4. Check for concussion symptoms when injuries to the head and collisions between two players occur (regardless of if it is a head collision or not.) When in doubt, sit them out!
5. If the injury or illness occurs during a game, the umpire may require an opinion from a medical person before allowing player to re-enter the game.
6. Safety parents have authority to overrule Manager if they believe a player should be pulled from practice or game due to an injury.
7. If professional medical treatment is received during game/practice or following due to the specific injury that occurred, then player must present a non-restrictive medical release prior to being allowed back in practice or another game.
8. Report all injuries within 48 hours to the league Safety Director by completing the Injury Tracking Report and emailing it to safety@millcreeklittleleague.com.
