

**Step 1: Measure yourself**

**Step 2: Find your size**

Our size chart is based on **body measurement**; choose the size by looking at our size chart. Our factory typically adds 1.5-2.5 inches to the specified measurements, especially for our loose-fitting uniforms. **But you only need your actual body measurement to figure out your size.** For example, if your youth boy player's chest size is 27-30 inches, you would just order a size YM, but expect the jersey chest measurement to be 32-33 inches because again we add 2-3 inches to our softball uniform for loose-fitting so they are not tight fitting.

If you're on the borderline between two sizes, order the smaller size for a tighter fit or the larger size for a looser fit.

**PAY ATTENTION:** Because all uniforms are hand sewn so please accept +/-1 inch allowance on each size compared to actual uniforms
