

Cape Express Caperoos Program

Welcome to the Cape Express Soccer Club Caperoos Program. My name is Mike Hickman and I am the Director of Coaching for Cape Express Soccer Club. We are excited to get our Caperoos program underway. I want to thank our Caperoos Director, Nat Sudell, for all her hard work and dedication to getting this program going for the fall 2020 season. As a result of the Covid Pandemic, the State of New Jersey, County of Cape May, U.S. Youth Soccer, and New Jersey Youth Soccer, have all developed a number of policies and protocols that CESC must abide by in order to run the Caperoos program. I am enclosing the procedures which **MUST be followed in order to participate.**

The following procedures are to be followed for Cape Express Soccer Club training sessions for Caperoos training at Ockie. They must be completed every day that the player attends training.

- Parents must complete the Covid Daily Questionnaire (aka Player Passport) on Capeexpress.com. It is listed as Electronic Covid Screening Tool on the homepage. (You will either receive a Green Passport on your cellular device which will allow you to attend practice or a Red Passport will not allow you to attend practice). In the event that the Passport Program is not available, parents will be required to complete a Daily Questionnaire Form which will be made available at the field.
- Upon arrival at the training facility there will be a designated CESC representative who will be situated in a prearranged location and greet the player/parent. All players and parents are required to wear a mask and social distance throughout the clearance process. Players will wear the mask until they are told they may remove it by CESC training personnel. In the event there is a medical condition where the player or parent are unable to wear a mask, please provide the corresponding documentation from a family physician.
- The CESC Representative will review the player's passport/documentation and will take the thermal temperature of the player. If a player's temperature is below 100.4 they will proceed to the playing area where they will meet their assigned Trainer and Assistant Coach. Players whose temperature is 100.4 or above will be asked to return to their vehicle for five to ten minutes then return where a second temperature will be taken. If the temperature drops below 100.4 they will be allowed to train. If the temperature is still 100.4 or above, they will not practice and may not return to training/games until medically cleared by a family physician.
- The temp check will be completed via an infrared thermometer reading of the forehead. Parents have the options of requesting a scan of the wrist.
- At the conclusion of training, players will be required to wear a mask as they exit the field(s) and meet with their designated rides etc. All CESC players will be required to social distance as they enter and exit the field.
- Throughout the training process, parents can remain in the general training area but must social distance throughout the training.
